

Information. Connection. Empowerment.

In partnership with the Ohio Department of Education,
the Outreach Center at OCALI presents a video module:

Promoting Access for People who are Deaf, Hard of Hearing, Blind, or Visually Impaired

Information is Everywhere You Look and Everywhere You Listen.

When vision or hearing is affected, part of that information is missing. Promoting access to information connects us, it empowers us, and it promotes independence. And when we promote independence, people are able to grow, learn, and live their best lives.

This self-paced training module offers introductory information, evidence-based strategies, and scenarios at home, school, and in the community designed to help you:

- Establish Relationships
- Understand Supports
- Experience Access in Action
